Software Engineer

Software engineer building SaaS platforms, B2B systems, web applications and mobile apps end to end. Six years of running my own products and companies: hosting infrastructure, a scripting business serving 4,000+ customers, and a development studio delivering client software.

EXPERIENCE

Noex Development — Chief Executive Officer

2026 – Present

noexdev.com

- Founded and lead a development studio building SaaS products, B2B platforms and custom web and mobile software for clients.
- Own the full delivery cycle: scoping with clients, architecture, frontend and backend implementation, deployment and support.
- Set engineering standards and direct technical decisions across concurrent client projects.

X Scripts — Chief Executive Officer

2024 – Present

scriptsx.tebex.io

- Build and sell a catalogue of FiveM scripts and systems, grown to 4,000+ customers.
- Develop in Lua with web-based configuration and admin tooling; maintain and version releases for a live customer base.
- Run the storefront, pricing, documentation and customer support alongside development.

Foxy Hosting — Founder & Chief Executive Officer

2020 – 2024

- Ran a VPS and game server hosting company serving 500 customers.
- Managed provisioning, server configuration, uptime and migrations across the hosting fleet.
- Handled billing, onboarding and technical support directly with customers.

SKILLS

Languages Lua, JavaScript, TypeScript, SQL

Frontend React, responsive UI, component architecture

Backend APIs, databases, authentication, integrations

Platforms Web, mobile, SaaS, VPS and game server infrastructure
